

E31 DIGITAL BROCHURE

Business Systems and Fawtara Readiness

A combined overview of E31 Accounting, Smart POS, Logistics Management, and Oman Fawtara technical readiness for businesses that need practical software, clear records, and controlled deployment.

Included Solutions

E31 Accounting System	Finance control for Oman businesses
E31 Smart POS System	Retail checkout, inventory, and reporting
E31 Logistics Management	Shipment, fleet, driver, and document control
E31 Fawtara Readiness	Technical preparation for Oman e-invoicing

This combined brochure is used by the Download Brochure buttons on the Oman solution pages.

BUSINESS SOFTWARE FOR OMAN

E31 Accounting System

Finance control for Oman businesses

A bilingual accounting workspace for invoices, suppliers, expenses, journals, trial balance, audit records, and VAT-ready reporting.

Core Capabilities

- Invoice, payment, supplier, and expense records
- Cashbook, journal entries, and trial balance
- VAT-ready fields and finance reports
- Import support for structured CSV and XML records

Delivery Notes

- Configured around the client workflow, users, roles, and reports.
- Available with demo, custom quote, and deployment planning.
- Fawtara readiness is technical preparation only and does not claim official certification.

BUSINESS SOFTWARE FOR OMAN

E31 Smart POS System

Retail checkout, inventory, and reporting

A fast cashier and retail management system for barcode selling, product control, stock movement, OMR pricing, VAT, customers, suppliers, and daily reports.

Core Capabilities

- Barcode checkout and product search
- Inventory, supplier, and customer records
- Receipt workflow with VAT-ready totals
- Local or cloud deployment options

Delivery Notes

- Configured around the client workflow, users, roles, and reports.
- Available with demo, custom quote, and deployment planning.
- Fawtara readiness is technical preparation only and does not claim official certification.

BUSINESS SOFTWARE FOR OMAN

E31 Logistics Management

Shipment, fleet, driver, and document control

A practical operations command center for shipment status, drivers, vehicles, delivery proof, documents, finance, and customer service.

Core Capabilities

- Shipment lifecycle and status tracking
- Fleet, driver, and assignment records
- Documents and delivery proof
- Finance, collections, and customer support views

Delivery Notes

- Configured around the client workflow, users, roles, and reports.
- Available with demo, custom quote, and deployment planning.
- Fawtara readiness is technical preparation only and does not claim official certification.

BUSINESS SOFTWARE FOR OMAN

E31 Fawtara Readiness

Technical preparation for Oman e-invoicing

A technical readiness layer for UUID support, XML-ready invoice records, validation, status logs, audit trails, and future connector integration.

Core Capabilities

- Invoice UUID and XML generation readiness
- Status logs, validation checks, and audit trail
- Connector structure for future accredited provider setup
- No official approval or certification is claimed unless formally issued

Delivery Notes

- Configured around the client workflow, users, roles, and reports.
- Available with demo, custom quote, and deployment planning.
- Fawtara readiness is technical preparation only and does not claim official certification.
